

SIDDHANTH THAKURI

Software Engineer | Full-Stack, AI/ML

Sydney, Australia | [+61 452025193](tel:+61452025193) | thakurisiddhanth1@gmail.com
[in linkedin.com/in/siddhanththakuri](https://www.linkedin.com/in/siddhanththakuri) | github.com/SIDDHANTH-THAKURI

PROFESSIONAL SUMMARY

Versatile and results-driven Software Engineer with a strong foundation in computer science and hands-on experience building scalable backend, full-stack, and cloud-based applications. Proficient in Python, C#, JavaScript/TypeScript, React.js, and ML frameworks. Adept at designing, coding, and delivering robust solutions in agile, collaborative teams. Passionate about learning new technologies, solving complex problems, and making a positive impact through software.

TECHNICAL SKILLS

- **Languages:** Python, c#, JavaScript, TypeScript, C, PHP
- **Software Engineering:** Full-Stack, Software Design, Architecture, Best Practices, Code Reviews, Agile Development
- **Web Dev:** HTML, CSS, REST APIs, FastAPI, Express.js, React, Vercel, .NET MVC
- **Data Storage:** MySQL, SQL Server, MongoDB
- **AI/ML:** Transformers, NLP, Computer Vision, Machine Learning, Deep Learning
- **Tools/Platforms:** Docker, FastAPI, Git, Postman, JWT Auth, Microservices, CI/CD, Cursor

PROFESSIONAL EXPERIENCE

Software Developer

Accenture, India

Aug 2021–Jun 2023

- Designed and coded robust solutions for business-critical problems, delivering production software in agile, collaborative teams.
- Developed backend and full-stack applications in c#, python and JavaScript, supporting scalable systems and large-scale data pipelines.
- Drove best practices in software engineering, including code reviews, testing, and continuous integration.
- Worked with team members to develop architecture and design for new and existing systems.
- Practiced strong communication, teamwork, and independent problem-solving to deliver high-quality results.

KEY PROJECTS

• MedMatch - Clinical Decision Support System (CDSS) (2025)

React.js, Node.js, Express.js, FastAPI, Python, MongoDB, ML/DL

- Led end-to-end development of a clinical decision support platform for drug interaction analysis and patient health management, featuring distinct doctor/patient portals with RBAC (Role Based Access Control) using React, Node.js, Express.js, FastAPI, and MongoDB.
- Integrated deep learning (BinaryDDI) and ChemBERTa models for DDI prediction and drug classification, providing real-time prescription validation and safety alerts crucial for decision support.
- Deployed an AI-powered assistant (LLMs) for patient queries and medical history summarization; built robust back-end APIs for user authentication, prescription management, and AI-driven responses.
- **Live:** medmatch-frontend.onrender.com

• AI-Powered 3D Portfolio Website (2025)

Next.js, Node.js, Three.js, Supabase, Vercel, OpenRouter

- Designed and deployed a modern, interactive portfolio with a 3D solar system theme, animated planets, and an integrated AI assistant (Sid AI) powered by LLMs.
- Showcases my skills, projects, and analytics with a beautiful, responsive design, advanced animations, and real-time feedback/analytics via Supabase.
- Implemented advanced monitoring and reporting features for site usage and performance.
- Practiced full-stack and cloud Deployment.
- Deployed on Vercel with robust DevOps and analytics integration.
- **Live:** siddhanththakuri.com

• Feature Distribution Analysis (ImageNet vs. ImageNetV2) (2024)

Python, scikit-learn, PyTorch, numpy, matplotlib, pandas

- Investigated classification performance drops by comparing feature distributions of ImageNet and ImageNetV2 using pre-trained EVA-02 vision transformers with Python.
- Developed and optimized classifiers (e.g., SGD, RandomForest, LogisticRegression) on 1M+ extracted features (Python, Pandas, Scikit-learn), implementing incremental learning for large-scale data handling.
- Visualized high-dimensional feature shifts using t-SNE and UMAP, identifying dataset distribution drift as a key factor contributing to a model generalization gap of approx. 5

EDUCATION

Master of Computer Science (Machine Learning & Big Data)

Completed 2025

University of Wollongong, Australia

Bachelor of Aeronautical Engineering

Completed 2021

MLR Institute of Technology (Affiliated to JNTUH), India

AWARDS & CERTIFICATIONS

- Accenture Unsung Hero Award (2022): For outstanding technical contributions.
- Deloitte Tech Simulation (2024): Tableau data dashboards and business dataset analysis.
- Infosys InfyTQ Workshop (2020): Python and SQL.
- Python Crash Course (Coursera/Google), (2020)
- Microsoft Certified: Security, Compliance, and Identity Fundamentals, (2021)

PERSONAL ACHIEVEMENTS

- Solved 275+ LeetCode problems (Data Structures & Algorithms)
leetcode.com/u/siddhanththakuri
- Typing speed: 70-100 WPM
