Career Profile

Results-driven Software Engineer with professional experience at **Accenture** and a **Master's in Computer Science**. Skilled in **designing, developing, and deploying scalable full-stack and AI-powered applications**. Fueled by a passion for learning, I consistently deliver **high-quality, impactful software solutions**.

Education

Master of Computer Science (Machine Learning & Big Data) | Jul 2023 – Jul 2025

University of Wollongong, Wollongong, NSW

Awarded **Academic Excellence Scholarship**; Graduated with **Distinction (WAM: 77.88/100)**

Bachelor of Aeronautical Engineering | Jul 2017 – Jul 2021

MLR Institute of Technology (JNTUH), Hyderabad, India

Graduated **First Class (GPA: 6.98/10)**; Published **research paper** based on final year project

Relevant Industry Experience

Software Developer | Accenture, India | Aug 2021 – Jun 2023

- Delivered **high-impact features** for a **large-scale enterprise application** using **C#, ASP.NET Core MVC**, and **React.js**, improving user experience and reducing recurring support requests.
- Enhanced **MS SQL Server database performance** by optimising queries, stored procedures, and indexing strategies, leading to noticeably faster data retrieval and improved system responsiveness.
- Designed and integrated **REST APIs** to enable seamless, secure data exchange between applications, reducing manual processes and increasing operational efficiency.
- Partnered with **non-technical stakeholders** to translate business requirements into precise technical specifications, ensuring solutions met both functional and strategic objectives.
- Actively contributed in an **Agile/SCRUM environment** through sprint planning, daily stand-ups, and **peer code reviews**, helping maintain consistent delivery timelines and code quality.
- Supported **deployments across Development, Staging, and Production environments** in **Microsoft Azure**, streamlining release processes and minimising downtime during updates.

Key Skills

Technical Proficiencies

- Languages:** Python, C#, JavaScript, TypeScript, C, PHP
- Frameworks & Web:** React.js, Next.js, Node.js, Express.js, FastAPI, .NET MVC, REST APIs
- Databases:** MongoDB, SQL (MySQL, SQL Server), Supabase
- Tools & Platforms:** Docker, Git, CI/CD, Vercel, Render, Postman

Full-Stack & AI Development

- Built and deployed **end-to-end applications** by integrating advanced **AI models (Transformers, LLMs)** with modern web stacks (React, Node.js, FastAPI), as demonstrated in the **AI Drug Interaction Portal** project.

Problem Solving & Analysis

- Delivered analytical solutions** at Accenture by identifying root causes of recurring user issues and **optimising system performance**, reducing support requests and improving client satisfaction.

Communication & Teamwork

- Excelled within a **collaborative, agile team of 8** at Accenture, contributing to **system architecture discussions** and performing **120+ code reviews**, reducing post-release defects by 18% and ensuring timely delivery of **3 enterprise-scale projects**.

Key Projects

AI-Powered Personalized Drug Interaction & Doctor Portal | Jan 2025 – May 2025 (5 months)

Technologies: React.js, Node.js, TypeScript, FastAPI, Python, MongoDB, Deep Learning, OpenRouter (Mistral 7B)

- Led **full-stack development** of a **clinical decision support system** with individual doctor portals for storing consultation notes and generating **AI summaries** of patient history, medications, and allergies.
- Built a **secure chatbot module** that extracts insights from uploaded medical histories while protecting patient data.
- Developed **custom deep learning models** based on SMILES: binary DDI prediction, interaction type classification, and patient suitability checks; results show strong potential for larger-scale deployment.
- Experimented with **fine-tuned LLMs** (DeepSeek R1, GPT-4, Mistral), highlighting hallucination risks in medical contexts.
- Used **MongoDB** to securely store user, doctor, and medical data.
- Coordinated a small team, reviewing contributions and integrating components.
- **GitHub:** github.com/Team-DDI-CSIT998/Personalised_DDI_Checker
- **Live Demo:** medmatch-frontend.onrender.com

Professional Development & Achievements

- **Problem Solving:** Demonstrated strong algorithmic proficiency by solving 275+ problems on LeetCode. leetcode.com/u/siddhantthakuri/
- **GitHub Portfolio:** Developed and uploaded multiple personal and collaborative projects, including full-stack and AI-powered applications. github.com/SIDDHANTH-THAKURI
- **Accenture Unsung Hero Award (2022):** Recognised for outstanding technical contributions and problem-solving skills.
- **Deloitte Tech Simulation (2024):** Built data dashboards and performed analytical assessments of business datasets in Tableau, demonstrating applied problem-solving and visualization capabilities.
- **Microsoft Certified:** Security, Compliance, and Identity Fundamentals (2021).
- **Python Crash Course by Google (Coursera) (2020)**

Professional Memberships & Volunteering

- **CodinGame Spring Challenge 2025:** Participated in a global online programming contest, solving algorithmic challenges in a gamified environment.
- **University of Wollongong Student Orientation Volunteer (2025):** Assisted in welcoming and guiding new students during orientation week, helping them settle into campus life and providing support for events and activities.
